

Murrumbidgee Irrigation DRAINAGE CHANNELS CLOSURE NOTICE

Due to treatment of noxious weed, *Sagittaria graminea* in MIA drainage channels, the Murrumbidgee Irrigation (MI) drainage system will be closed and isolated from 1 June 2010 for a period of up to 12 weeks.

A permit from the Australian Pesticides and Veterinary Authority has been issued to MI for the use of **Casoron G Herbicide**, a pre emergent treatment that prevents regrowth of vegetation when applied. Do not attempt to control or remove this weed yourself as it can spread rapidly due to its many methods of reproduction.

Under no circumstances is water from the drainage system to be used during this period. MI will advise customers when the drainage system reopens and thanks customers for their cooperation during this period.

For further information,
visit MI's website

www.mirrigation.com.au

or call Jody Rudd on 6962 0200.
