

CLOSE OF SEASON FINAL ROSTERED WATERING FOR 09/10

Final Rostered watering for continuous supply zones will take place between 16 - 24 June. ALL orders are to be placed via EASYWATER online or telephone. The close of the 2009/10 season is 25 June.

MI encourages citrus growers including those in IHS zones to use this opportunity to water for frost protection as channels will be drained for capital works and maintenance over winter. Customers are encouraged to plan to ensure they are self sufficient until the start of the 2010/2011 irrigation season which is likely to be early to mid August.

Information regarding the 2010/2011 season including NSW Office of Water (NOW) announced water allocations will be sent via fax/email, SMS and posted on MI's website
www.mirrigation.com.au
when available.
