GENERAL INFORMATION

How are the charges determined?

As a shareholder owned public company, where our shareholders are our customers, we operate as a cost recovery business. Our cost base is largely fixed and relates to the size and number of infrastructure assets we own and maintain. We run our 3,500km of supply and drainage infrastructure as an integrated network which means that customer charges do not vary based on location. Our access and network charges are essentially based on the size and number of assets and customer connections.

Our Board reviews our pricing structure annually and periodically undertakes an independent economic analysis of cost drivers and network costs throughout which customer participation is invited.

Feedback on our network services is welcome at any time by contacting us. This feedback helps us to identify areas for network development, reconfiguration or retirement and prioritise our asset management program.

When are my charges due?

Most of our charges including the Access, Network and Usage charges are billed annually in arrears. This is also the case for the Government Bulk Water Recovery charges. Other charges are billed in advance, except for interest charges which accrue daily and are charged monthly on overdue accounts.

If you are having difficulty paying your bill by the due date, please contact us on (02) 6962 0200. Payment arrangement options are available.

What if I have a question about the charges or my bill?

Questions and enquiries are always welcome and can be made via:

- **email** info@mirrigation.com.au
- **phone** (02) 6962 0200
- **letter** Locked Bag 6010 Griffith NSW 2680

or in person at either of our Hanwood or Leeton Offices.

In the event of a dispute over your charges, resolution mechanisms are outlined in our Contracts, which include mediation and expert determination.
