

Residential Connections

A Residential Connection is for customers with high security water entitlements (HS WE's) who require water for use on an area up to 1 Ha. This new supply option will enable us to deliver water to our customers in the best way possible, at the fairest price.

We have introduced this product as part of our unmetered upgrade program, with all Murrumbidgee Irrigation (MI) outlets required to be either metered or supplied through a restricted connection.

What are the benefits of a Residential Connection?

- **Simple and efficient** water supply
- **Significant savings:** reduction in connection costs and annual charges compared to low flow outlets

Who is eligible to use this product?

This product is predominantly for domestic and/or garden water usage, and only for customers with high security water entitlements.

Customers with no high security water entitlements will need to use our Garden Licence product, or purchase high security water entitlements.

How will this work?

Designs include options for both 2ML and 4ML of HS WE holdings. These sizes are typically suited for:

- 0.5 Ha for a Small RC (2ML) 40mm suction pipe/32mm discharge pipe, and
- 1 Ha for a Large RC (4ML) 50mm suction pipe/40mm discharge pipe

Residential Connection customers are required to supply their own pipe and pump to access water through the MI-installed access point.

Who do I contact for more information?

For more information, please contact us on 02 6962 0200 or email info@murrirrigation.com.au
