

# What connection is right for me?

## Urban Channel Pipeline (UCP)

Delivering water to our customers in the best way possible means accounting for every drop and ensuring all water diverted from the MI system is authorised.

We know that our customers have a range of requirements when it comes to accessing the MI water delivery system. From large productive farms through to small home gardens, there is an option to access the MI supply network to ensure you get the water you need, when you want it.

### Supply options

#### Metered outlets

You can access our piped network in a way that suits your requirements through one of three different sized metered outlets.

- Low Flow Meter (0-1 ML/day)
- Small Meter (0-6 ML/day)
- Medium Meter (2-15 ML/day)

#### Residential Connection

A Residential Connection is for customers with High Security Water Entitlements (HS WE) who require water for use on an area up to 1 Ha. This product is for domestic and/or garden water usage, with options for a Small (2 HS WE's) or Large (4HS WE's). Residential Connection customers are required to supply their own pipe and pump to access water through the MI-installed access point.

Customers with no high security water entitlements will need to use our Garden Licence product, or purchase High Security Water Entitlements.

#### Garden Licence

For domestic garden water usage you can apply for a Garden Licence. The Garden Licence includes options for both 2ML and 4ML of water, the maximum size of the land can be no greater than:

- 1/2 ha for a small HGL (2ML), or
- 1 ha for a large HGL (4ML)

Garden licence customers are required to supply their own pipe and pump to access water through the MI-installed access point.

### Want to change an existing connection?

If you are changing your farming practices or making changes to your on-farm set up, come and talk to us about your plans and what connection suits your supply needs.

### What do I need to do next?

If you would like to know more about the connection options suitable for your needs, please call us on (02) 6962 0200.

If your supply connection is in our UCP, you don't need to do anything, our customer engagement team will call you to arrange a time to go through options.
