

Unauthorised use

This is what unauthorised use of water looks like
– small amounts add up.

Collective small unauthorised use results in significant losses

Water use for machinery wash down, spray mix or home gardens all adds up.

Water is a precious resource - if you are taking it without authorisation, it is theft

There is no such thing as unauthorised access to channels.

If you don't have an account with us, and you are not receiving a bill, the access is not authorised. Please speak to us.
